

MSM Cream

Improve The Quality of life

Reduce Joint Pain

Reduce Muscle Stiffness

Maintain Joint Mobility

UNIQUE FORMULA:

-  **MSM** Cream will-studied formula with clinical base.
-  **MSM** Cream “Time Tested” with pain reduction within 4 to 6 minutes.
-  **MSM** Cream is effective anti-inflammatory with excellent transdermal absorption.
-  **MSM** Cream improved joint function with significant reduction on symptoms.
-  **MSM** Cream has an excellent safety profile.
-  **MSM** Cream Enhance cartilage function.
-  **MSM** Cream Provide anti-inflammatory activity.
-  **MSM** Available in tube convent 70ml topical form.

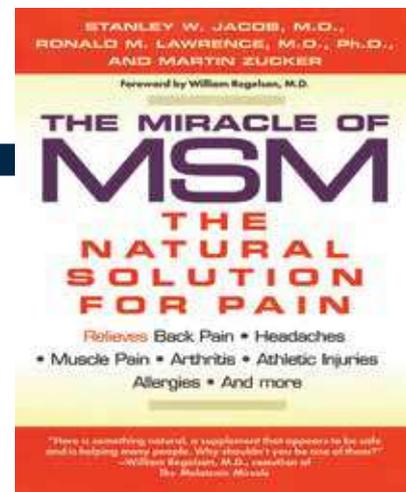

PREMIUM Think Global... Act Local

MSM MECHANISM OF ACTION

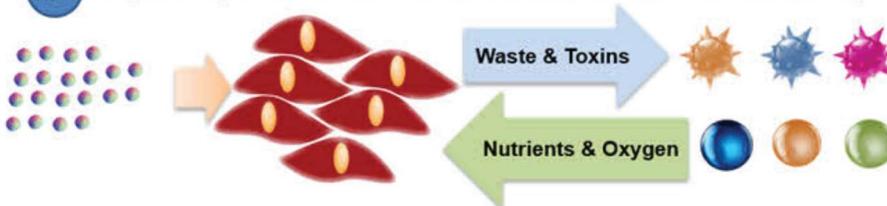

1 Swollen Muscle, Joint and Tissue Cells

In older bodies, cell waste and toxins build up inside cells. This creates swollen and inflamed muscle cells, joints, and is the root for Pain, Aches and Inflammation. The cells also have a tough time getting nutrients and oxygen through there hardened walls.

2 Organic Sulfur Works With The Cells To Increase Cell Wall Permeability

Cell walls then open up, allowing cells to:

- ✓ Remove wastes and toxins.
- ✓ Receive nutrients, oxygen and liquids.

3 Now Healthy Muscle, Joints and Tissue Cells – Longer, Smoother, No Inflammation

As a result, Muscle cells and Joints return to normal, optimal function. After removing waste and toxins, and getting fresh nutrients, the cells thrive, and work properly again, relieving the pain and inflammation.

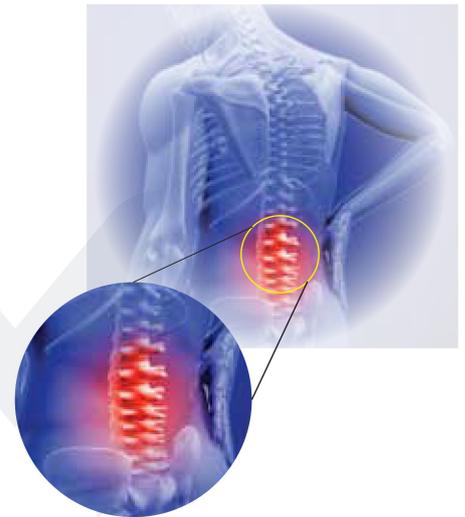

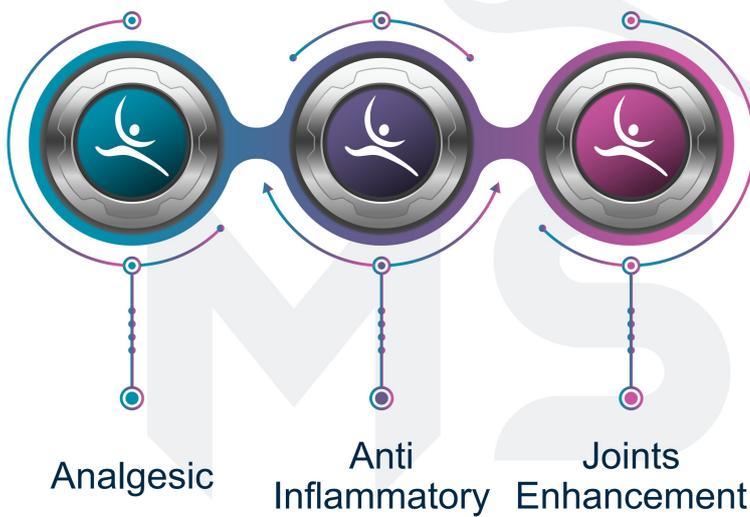

CHRONIC MUSCLE SKELETAL PAIN

80% of adults experience low back pain at some point in their lifetime.

ACTIVE CONSTITUENT

METHYL SULPHONYL METHANE:

-  Strong Anti-Inflammatory.
-  Natural Analgesic.
-  Acts As A Carrier.
-  34% Sulfur By Weight.

BURDOCK ROOT (ARCTIUM LAPPA) UNIQUE PLANT

-  Contains a wide range of minerals that strengthens the bones to resist arthritis.
-  Proved to be anti-inflammatory (where its unique oil is rich in phytosterols)

GLUCOSAMINE SULFATE

-  Support the structure and function of joints,
-  Stimulates cartilage production by maintaining collagen and proteoglycans
-  Inhibits degradation of cartilage by influencing Chondrocyte activity
-  Sulfate is needed by the body to Enhance cartilage Function

MENTHOL (PEPPERMINT OIL)

-  Counter Irritant by stimulating the nerves that perceive cold and depress the nerve pain
-  Provide blood supply to muscle tissue .

CAMPHOR (CINNAMOMUM CAMPHORA)

-  Increase local blood flow reduces pain and swelling
-  Counter Irritant which reduces pain and swelling.
